Stocking Rose Gardens
1949-1950

SAN JOSE · CALIFORNIA

1950 all American Roses

Sutter's Gold

SUTTER'S GOLD (H. Swim) \$2.50
An excellent rose featuring exquisite, long-pointed, bright yellow buds, richly shaded with orange and red. The opening flower is a lovely high centered arrangement of about 30 crisp, heavy textured petals, and it possesses a superior fragrance unusual in yellow roses. The very vigorous well balanced plant has been very resistant to the common rose diseases. A fine rose! Winner of Foreign Gold Medal of the famous Bagatelle Rose Trials in Paris.

PLANT PAT. PENDING

Fashion

FASHION (See Cover) (Jackson & Perkins) \$2.00
An exquisite new floribunda in a color new to the rose world. The clusters of oriental-red buds open into luminous coral pink flowers overlaid with gold, which soften to clear coral. As the slow opening bud unfurls, it provides a show of ruffled petals encircling a rich display of golden yellow stamens.

This vigorous, bushy floribunda grows to a height and diameter of 2 1/2 to 3 ft. being fully clothed with rich bronzy green foliage. Received Gold Medal at London Flower Show.

PLANT PAT. 789

1950 All American Roses

Capistrano

CAPISTRANO

(Germain's Seed Co.) \$2.50

This vigorous, upright rose produces an early abundance of large buds and flowers of a rich shade of deep, glowing rose pink, with good fragrance. Capistrano grows about 4 ft. in height and is well clothed in heavy, leathery foliage.

PLANT PAT. PENDING

Mission Bells

MISSION BELLS

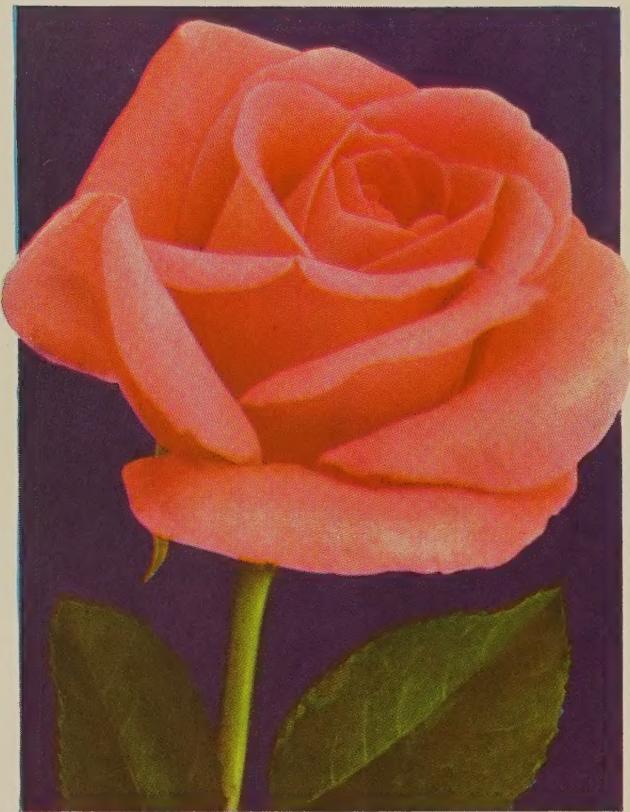

(Germain's Seed Co.) \$2.50

An early blooming deep salmon pink rose. The long-pointed buds, usually borne singly on a stem, open to full centered flowers of average fragrance. The plant is vigorous in growth and rangy in habit and seemingly quite resistant to disease. An excellent rose.

PLANT PAT. PENDING

Distinctive

Sweet Sixteen

SWEET SIXTEEN (W. E. Lammerts)

\$1.50

Here is a superb rose, particularly adapted to coastal areas. The long slender buds open to beautifully formed flowers of light pink with shades of rose and gold. These sweetly scented blooms are borne on strong stems and are excellent cut flowers. This medium growing plant is a continuous producer of perfect blooms.

PLANT PAT. 631

Juno

JUNO (H. C. Swim) \$2.00

This new variety has combined large size, bright color, and perfection of form into a very fine rose. The buds and flowers are extraordinarily large, but because of the lovely lines never appear coarse. As the long, tapering clear pink buds unfold into big double (40 petalled) high centered flowers, the color fades gracefully to lighter tones of pink, but never loses its attractiveness. The plant is low, bushy and compact, with short stout stems abundantly covered with large glossy leathery foliage.

Juno was awarded the Certificate of Bagatelle at Paris, France.

PLANT PAT. APPLIED FOR

Roses of 1950

Fandango

FANDANGO (H. Swim)

\$2.00

This is a beautiful rose with rich coloring and mild fragrance. The ovoid buds are a rich deep scarlet and gracefully change to a bright cerise red as the flower opens. The large petals (16 to 25) have a crisp ruffled appearance which adds to the beauty. This earliest of bloomers is compact and vigorous with glossy heavy foliage to background the endless mass of color. A fine rose.

PLANT PAT. PENDING

New Yorker

NEW YORKER

(Jackson & Perkins) \$2.00

A very double red rose, which is attractive through all stages of development. The multi-petaled full bud opens to showy scarlet rose with a rose-red undertone overlaid with a rich velvety sheen. The blooms of raspberry fragrance are long lasting and do not blue under normal conditions. A vigorous, somewhat upright grower of about 3 feet, well clothed with attractive foliage.

THE AMERICAN ROSE SOCIETY

This splendid organization of nearly ten thousand enthusiastic rose lovers, fosters the growing of better roses and real rose pleasure for the amateur. Their numerous publications are filled with interest and their advisory council is always ready to be of assistance to you. You are most cordially invited to become a member. We are members and shall be glad to send you an application blank, or write directly to the American Rose Society, Box 687, Harrisburg, Pa.

My Rose Garden

BY RUSSELL RAMSEY

Here, midst my roses, I may come to worship
Beauty, fragrance, sunshine, grassy sod.
The sanctuary of a quiet cathedral
Where I may rest, and be alone with God.

Behind, I leave all evil, care, and sorrow,
And from my roses humbly learn to pray—
As in the breeze they wave a friendly greeting—
That my life reflect some beauty every day.

"Thank you so much!"

May we thank you, our Rose Friends, for another year of cherished association and for your patronage. Your letters of comment are an inspiration to spur us on to try to give you more efficient service, as well as better roses, which we have been attempting to do for over twenty years. We shall be looking forward to hearing from you soon again.
Cordially,

Clyde & Ramona Stocking
Clyde and Ramona Stocking.

It is our desire to create an interesting rose booklet with practical suggestions and one easily used. We shall appreciate all comments on this booklet in order to improve it in future years.

We have tried to describe all roses as we see them in our gardens. From time to time, our impressions change as we study the different varieties, both in our All American Rose Selections Test Gardens and in our growing fields. Therefore we attempt to give you the advantage of our testing and study in this booklet.

CALIFORNIA ROSES

We are proud of our California grown roses and believe you will be, too, once you have seen them. Our pride does not end with their nativity, but is in their quality and selectivity as well.

It is you, our friends, who make the Stocking Rose Gardens possible. We know it. We appreciate it. Our only way of showing appreciation is by giving you as fine a product as possible in a prompt and courteous way. We strive to measure up to this standard.

Your satisfaction is our excuse for existing. We want your garden to have the biggest and the best. Our interest does not end with your purchase. Thus it is our privilege to strive to give satisfaction in service, quality, and dependability.

PINTO TAG

We are pleased to announce that our nursery has been the first one in Northern California to receive this award. This tag signifies that the nursery has been given a clean bill of health, and that the stock may be shipped into most of the counties without further inspection.

GIFT CERTIFICATES

We are members of the American Association of Nurserymen and can issue or accept gift certificates or merchandise orders of roses to the amount of \$5.00 and up. This service enables the recipient to select his own plants from stock of any member in the United States.

DISCOUNTS—When purchasing 10 or more plants, regardless of varieties, bushes or climbers, deduct 10%, except on special groups where no further discounts are allowed.

PACKING AND SHIPPING—On all orders of \$5.00 or more on bush and climbing roses, we shall pay delivery charges to any point in the U. S. We reserve the right to choose the best way to ship. On orders less than \$5.00, please add 50c for packing and shipping.

CALIFORNIA SALES TAX—Please add 3% to purchase price. This does not apply to purchasers outside the state.

THE ALL AMERICA ROSE SELECTIONS

The roses carrying this distinctive emblem are the most outstanding rose introductions of recent years. New introductions are being judged constantly in all eighteen All American Rose Selection Test Gardens in the United States.

The A.A.R.S. is an organization of nurserymen and hybridizers banded together for the specific purpose of selecting the best new introductions each year. New roses are sent to the eighteen test gardens where they are tested over a period of two years before they are introduced to the general public. These roses are scored on thirteen basic points, such as form, disease resistance, etc. in these eighteen gardens which are located in as many different regions. At the end of two years, if any of the roses attain a high enough score, they are judged to be All America Winners.

Thus roses carrying this distinctive honor are roses of proven abilities.

We are happy to say here that we have one of these eighteen test gardens of which we are very proud.

SHIPPING—Our new rose crop is available about the end of December, at which time we commence shipping and continue through the middle of March. Our orders are handled in numerical order. We shall ship your order as promptly as possible at the proper planting time for your locality. Great care is taken in filling orders as well as in packing them to insure their reaching destinations in perfect condition. If through delay in shipping, the bushes should appear dry, bury the bushes in a trench, cover them completely with earth and keep wet for four days. Wet peat moss may be used if preferred. We guarantee every plant to be true to name and to reach you in good condition.

SUBSTITUTIONS—We never substitute unless advised to do so. It is our deepest desire to supply each and everyone with the desired varieties of roses. However, due to unforeseen circumstances, such as crop failures and unknown demands, we cannot always supply all of the varieties you order. *Thus to eliminate correspondence and delay, may we ask if we may substitute varieties of equal or more value in the same color range as ordered*, using our knowledge of the adaptability of varieties to your region, as our guide? It is our desire to serve you and to do it well; thus we ask this privilege of substitution. Please designate (yes or no) such permission on your order.

TERMS—In keeping with the general practice of nurseries throughout the country, may we suggest you send cash with your orders. In cases where substitutions are not desired, prompt refunds will be made in appreciation of your initial kindness to us.

PLANTING AND CULTURAL HINTS

Open package as soon as received. If the roots are moist the plants may be planted at once. If, however, they appear dry, soak in water over night, and bury the entire bundle in a trench. Cover with earth and soak thoroughly. In three or four days the bushes will be ready to plant.

Cut off all bruised or broken roots with a sharp knife.

Loosen all labels, so as not to cut into plant.

Select a location free of tree or shrub roots, and exposed to at least half a day sun.

Dig a hole 18" to 24" in depth and width. If soil does not have good drainage, a gravel drain should be provided, Fig. 1.

It is always well to prepare soil well in advance of planting time. A mixture of 10% peat, 10% rotted manure and 10% rotted compost with 70% top soil produces excellent results.

Fill the hole half full of the mixture and firm well. Make a cone-shaped mound in center of hole, Fig. 1. Place crown of roots on cone, spreading roots, Fig. 2. Fill in above roots with soil and fill basin twice with water, Fig. 3. After water has settled, remainder of soil may be filled in, making sure the bud union is level or slightly above the level of the ground. In colder regions the bud union should be 2 inches below the surface of the ground. Mound soil four inches above union to prevent drying out and leave until growth starts when soil should be removed to just under bud union, Fig. 4.

All plants are pruned moderately. After planting, canes should be pruned from six to eight inches long, with the top bud pointing outward. Keep plants well watered all during the growing period.

Roses prefer a soil slightly acid, but will tolerate a slightly alkaline soil. They seem to do well in both light and heavy soil, but *must*, however, have good drainage.

Roses are usually hungry and thirsty. One of our most common mistakes is not giving them sufficient water. Keep the ground moist. Water thoroughly each time. Frequency of watering depends on your soil, usually from one- to three-week intervals. Water in morning only.

In the early spring, mulch rose beds with either cow manure, peat moss or lawn clippings. Cow manure is excellent if clean, but foul weeds and insect pests may be brought into the garden through it. Feed each plant a half tea-cup of a well-balanced commercial fertilizer every six weeks during the growing season.

If you do not use a mulch, cultivate the ground lightly after each watering; just enough to break the crust. Deep cultivating cuts the feeding rootlets.

Keep the roses well watered in summer. Allowing them to dry and go dormant causes the bushes to defoliate and sunburn.

Ground canes are the best wood on a rose bush. They are the soft new canes coming from around the bud union, with foliage and thorns identical to the older growth. Suckers come from below the bud union and have entirely different foliage, thorns and color. Suckers should be cut out as soon as identified.

PEST CONTROL

Roses, like all living plants, have insects and diseases to attack them. These may be controlled with little effort. The most important part of control is thoroughness and consistency. A program of spraying or dusting every ten days should be sufficient.

There are many effective sprays and dusts on the market. Often similar materials are sold under different trade names. We have found Rix (2 teaspoons to the gallon) and Fermate (1 tablespoon to the gallon) to be very effective in the control of rust and mildew. Vapadone or Extrax Delux added will control insects. In many sections Triogen, a combination spray is excellent. If one prefers dusts, duPont Rose dust, Ortho Rose dust, or a mixture of 9 parts of 325 mesh ground dusting sulphur to 1 part Fermate. Powdered nicotine or rotenone may be added to the latter as an insecticide.

A cleanup spray immediately after the winter pruning, consisting of 10 tablespoons of Bordeaux mixture to a gallon of water, is very effective in destroying fungi spores. This spraying should be repeated just before the buds break in the spring. Spray the ground around the plant, after raking up and burning the old leaves, as well as the plant.

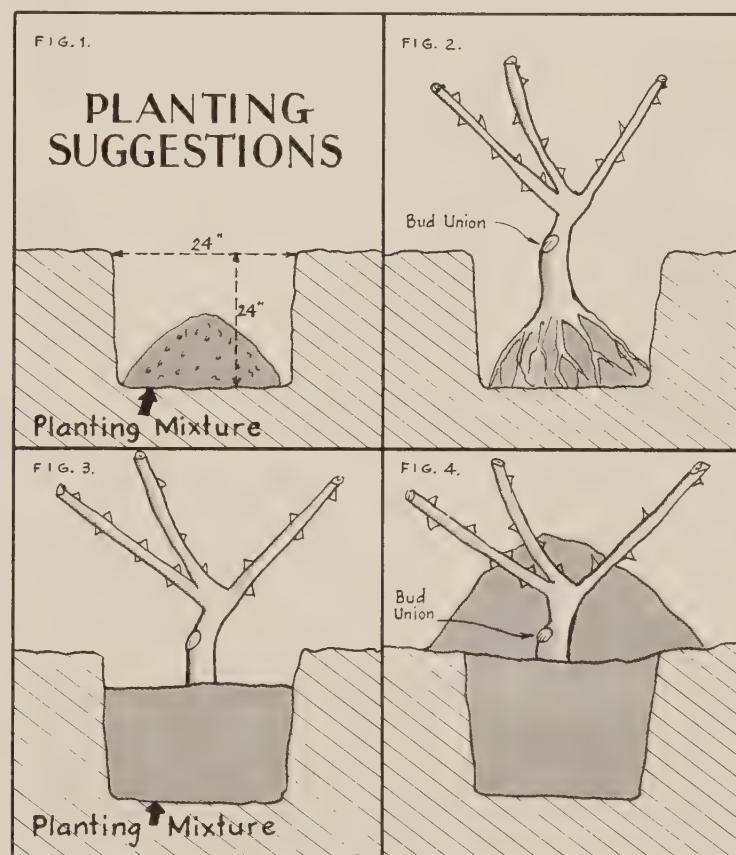

PRUNING

Pruning is very important. We cannot give complete instructions on pruning that will apply to all varieties and in all sections of the country. However, there are general rules that can be followed. As roses are produced on new wood, vigorous growth must be encouraged. During the dormant season, leave the new wood and cut out as much of the old wood as is possible and yet retain the form of the plant. Cut back about half of the previous year's growth, cutting $\frac{1}{4}$ inch above a leaf that is pointing on the outside of the bush. All dead and weak wood should be eliminated. Proper cutting of roses should be sufficient for summer pruning.

CUTTING ROSES

In cutting roses, always leave three or four leaves of the new blooming wood, cutting about $\frac{1}{4}$ inch above a leaf on the outside of the bush.

Cutting roses in the late afternoon has been proven to be the most satisfactory time. Double roses should be cut as the petals begin to unfurl, single roses as the sepals separate, showing the color. Mash or split the ends of the stems about a half inch and plunge immediately in cold water up to the neck of the rose. Leave out of doors over night. Occasionally a variety will keep longer by plunging the ends in boiling water. Charlotte Armstrong is one of these.

Bush Roses

Patented varieties of roses listed are being handled under license from the patent owners

ANGELS MATEU

A gold medal winner in 1934. The large double blooms are deep old rose flushed with orange, with a ripe raspberry fragrance. An upright growing plant with large glossy, disease-resistant foliage.

PLANT PAT. 174

\$1.50

APPLAUSE (H. C. Swim)

\$2.00

A many petaled light red rose. The ovoid bud opens to a full (35 to 40 petals) rose of a very pleasant fragrance which permeates the air about it. The large leathery leaves, which are quite resistant to disease, are borne on a compact bushy plant of 2 to 3 feet in height. This rose won the coveted Gold Medal at Bagatelle Gardens Paris, France in 1947.

PLANT PAT. 892

AUTUMN

\$1.25

An unusual combination of deep burnt orange and pink streaked with red. Moderately fragrant and very lasting. The bush is a strong upright grower with an abundance of thick glossy foliage. Mildews in some locations. Excellent in coastal regions.

CALIFORNIA

(Howard & Smith)

\$1.25

The unusual color of this beautifully shaped rose merits your attention. The large buds of bronze-yellow, overlaid with orange shadings, open to big semi-double fragrant gold flowers of unusual attractiveness. This very vigorous, spreading rose produces a profusion of bloom on a plant laden with large leathery, yet glossy foliage. Especially adapted to coastal areas.

PLANT PAT. 449

CALIFORNIA CENTENNIAL (Howard & Smith)

\$2.00

This new glowing crimson rose of vigorous and upright habit is certainly worthy of its name. The spiral, crimson buds of elegant texture, open to fine roses of intense fragrance. A well clothed rose of excellent growing habits.

PLANT PAT.

CAPISTRANO

(Germain's Seed Co.)

\$2.50

This vigorous, upright rose produces an early abundance of large buds and flowers of a rich shade of deep glowing pink, with good fragrance. Capistrano grows about 4 ft. in height and is well clothed in heavy, leathery foliage.

PLANT PAT. PENDING

CHARLOTTE ARMSTRONG (W. E. Lammerts)

\$1.50

Charlotte Armstrong has established itself as one of the finest roses ever introduced. It is a strong grower, produces excellent blooms and is most generous with them. The blood red buds are exceptionally long, pointed and open to large roses which vary in color from blood red to a very deep pink according to weather conditions. A spreading grower with good foliage. Fragrant and good as a cutting rose. Judged the best new rose in America for 1940. Recommended for warm climates. Winner of American Rose Society Gold Medal.

PLANT PAT. 455

CHRISTOPHER STONE

\$1.25

From all over the world come excellent reports of this lovely red rose. In our field this rose has been outstanding. The bud is long pointed, opening to a large double flower of vivid scarlet with a velvety crimson sheen. The plant is a bushy yet upright grower, about 2 1/2 ft., with fine bronzy green foliage that has mildewed slightly. A very prolific bloomer and fragrant.

COUNTESS VANDAL

\$1.50

A standout rose of magnificent form and striking colors. The bronze-pink buds open to large high centered blooms of blended carmine pink, buff and gold. This unique rose unfurls in a most interesting yet very symmetrical manner, which adds to its artisticness. The profuse number of blooms are borne on erect plants of medium growth with fine fragrance. A rose that cuts well.

PLANT PAT. 38

CRIMSON GLORY (Kordes)

\$1.50

In some sections of the country this rose has been acclaimed the best red rose. Of perfect form, the large, double urn-shaped flowers are a deep velvety crimson and intensely fragrant. The plant is a vigorous, bushy grower and continuous bloomer. At best in warm climates.

PLANT PAT. 105

DEBONAIR (Dr. Lammerts)

\$1.50

This new yellow rose has received very favorable comment. The 50-petaled rose is primrose yellow. The bud is medium size, with a high center and opens to a very fragrant rose 3 1/2 inches in diameter. The plant is a vigorous grower with very nice dark green, disease-resistant foliage.

PLANT PAT. 677

DAINTY BESS

\$1.25

Considered by many to be the best single rose. A medium size flower with crinkled and wavy petals of a soft rose pink. The bright crimson stamens make a very pleasing contrast. A good cut flower if cut in bud. A vigorous upright grower and prolific bloomer.

DIAMOND JUBILEE

(Boerner)

\$2.00

The high centered buff yellow buds open to large flowers of buff orange. Moderately fragrant. The plant is an exceptionally strong grower (4 ft.) with large, heavy, leathery foliage.

Best adapted to Pacific Northwest, Eastern and Southern sections of U. S.

PLANT PAT. 824

DIANE de BROGLIE

\$1.25

A striking rose of coral orange. The well shaped buds are borne on strong stems opening to soft coral orange double roses of good fragrance. The strong plants, branched well, are clothed with leathery green leaves and produce great numbers of flowers.

DUCHESS of PENARANDA

\$1.00

Here is an appealing color. The buds are brilliant orange, opening to coppery apricot. However, this color does change at different times of the year and as the flower ages. The plant is a strong grower with plenty of glossy, light green foliage, and an abundance of fragrant blooms.

Bush Roses

ECLIPSE

\$1.50

This is unquestionably one of the best all purpose yellow roses. The endless bounty of streamlined buds of rich gold enhanced by ornamental sepals are a new mark in grace and beauty. These elegant, tapering buds borne on long, straight stems are especially fine for cutting. The seemingly disease resistant plants with rich, heavy foliage have an upright habit. This prolific bloomer of excellent beauty is undoubtedly one of the very best roses.

PLANT PAT. 172

ENCHANTMENT (Jackson & Perkins)

\$1.50

A large, long lasting rose of delicate fragrance. Large, long stately buds of apricot and clear yellow at the base open to large, graceful high centered peach pink blooms. These wholesome flowers are borne on vigorous, upright plants, healthy with dark green foliage.

PLANT PAT. 737

ETOILE DE HOLLANDE

\$1.25

One of the best of the red roses. A beautiful dark, velvety maroon red that seldom blues. Very fragrant and excellent as a cut flower. Growth sometimes rather slow the first year, after that a vigorous grower with an abundance of disease resistant foliage. A prolific bloomer.

FAIENCE

\$1.25

In Faience we have a rose with a different color combination than in any other rose. It is a two tone of soft peach and cadmium yellow. The bud is beautifully formed, long and tapering and is cadmium yellow at the base and gradually fades to shrimp pink at the edge of the petals. In the open flower the outer side of the petal is cadmium yellow while the inside of the outer petals is China pink deepening to coppery rose in the center of the rose. A good grower, 3 to 4 feet, with large, clean foliage. A continuous bloomer.

FANDANGO (H. Swim)

\$2.00

This is a beautiful rose with rich coloring and mild fragrance. The ovoid buds are a rich, deep scarlet and gracefully change to a bright cerise red as the flower opens. The large petals (16 to 25) have a crisp, ruffled appearance which adds to the beauty. This earliest of bloomers is compact and vigorous with glossy, heavy foliage to background the endless mass of color. A fine rose!

PLANT PAT. PENDING

FORTY-NINER (H. Swim)

\$2.00

A most brilliant rose of vivid Oriental red with a reverse of chrome yellow changing to straw yellow. Buds are well shaped and have from 25 to 40 petals. Moderately fragrant. Plant is a strong grower with medium size, dark glossy foliage. A distinct novelty, which is at its best in the spring and fall.

PLANT PAT. 792

FRANCES ASHTON

\$1.25

A strong growing, free blooming single rose of a uniform carmine color and wine colored stamens. Excellent foliage. A good single.

FRAU KARL DRUSCHKI

\$1.00

One of the oldest roses in commerce today and still one of the best white roses. The buds are large, long pointed, tinged with carmine pink, opening to large snow-white blooms. Growth about four feet. At its best in the warmer climates.

FRED EDMUND

\$1.50

For our coastal regions and in the cooler climates, Fred Edmunds is a glorious rose. The slender pointed buds of burnt orange, open to beautiful roses of 25 petals of coppery orange changing to soft apricot. The plant is a moderate, bushy grower with beautiful glossy, dark green foliage.

PLANT PAT. 731

GIRONA

\$1.00

A good strong grower of great productivity and fine fragrance. The buds are long, pointed, of fine form, and are turkey red and golden yellow; a most pleasing combination. The plant is a strong upright grower, with long, sturdy stems, having leathery, disease-resistant foliage.

GOLDEN EMBLEM

\$1.25

A good old standby. The large, long bud of cadmium yellow, splashed and shaded red, is perfection in itself. These buds open to large, double blooms of canary yellow, oozing with fragrance. The strong, growing plants, covered with waxy green foliage, at times are susceptible to die-back. Still a good yellow.

GOLDEN HARVEST

\$1.50

What a grower this rose is! An excellent plant with an abundance of large, glossy, dark green, disease-resistant foliage. The large double flowers of clear golden yellow are very fragrant, reminding one of the old Marechal Niel. Adapted for coastal planting.

PLANT PAT. 729

GRANDE DUCHESSE CHARLOTTE

\$1.50

A brilliant rose of a new, unusual coloring. The beautiful, long buds are a rich claret red to a chestnut red and open to firm petaled bloom of begonia red to tomato red. In the open flower, the 25 petals recurve to make a delightful relaxed rose of artistic beauty with a faint carnation fragrance. The tall, vigorous, well branched plant produces long stems with a luscious foliage which seems immune to disease.

GRUSS an COBURG

\$1.25

This rose seems to adapt itself especially well to difficult surroundings, such as partial shade, windy corners, etc. The very floriferous plants produce yellowish buff flowers with varying outside shades. An extremely vigorous bush, of an upright nature. A late bloomer and very fragrant.

HEART'S DESIRE

\$1.50

A very fragrant red rose. Long pointed buds of luminous crimson to scarlet are produced on long stems. The stems are sometimes weak; often extra feeding will help correct this fault. The large, 30 petaled, high centered blooms are exceedingly fragrant. A vigorous, upright grower.

PLANT PAT. 501

HINRICH GAEDE

\$1.25

The bud is a clear nasturtium red opening to a large very double flower of orange red with a good fragrance. A most prolific bloomer; bush is a vigorous grower with glossy bronzy green foliage.

HORACE McFARLAND

\$1.50

A fine rose of exhibition qualities. A compact, upright plant, covered with large leathery foliage; produces an incessant supply of blooms. The large ovoid buds of deep apricot open to large, very double, well formed buff salmon blooms. These large flowers are borne on erect, strong stems and gradually pass to soft coral pink open flowers. Spicy fragrance.

PLANT PAT. 730

Bush Roses

J. OTTO THILOW

This is one of the finest, most perfectly formed pink roses. The flower is large, double, high centered and of a glowing rose pink. A constant bloomer. Growth is vigorous and with an abundance of thick leathery foliage.

JUNO (H. C. Swim)

\$1.25

This new variety has combined large size, bright color, and perfection of form into a very fine rose. The buds and flowers are extraordinarily large, but because of the lovely lines never appear coarse. As the long, tapering clear pink buds unfold into big double (40 petaled) high centered flowers, the color fades gracefully to lighter tones of pink, but never loses its attractiveness. The plant is low, bushy and compact, with short stout stems abundantly covered with large, glossy, leathery foliage.

Juno was awarded the Certificate of Bagatelle at Paris, France.

PLANT PAT. APPLIED FOR

LADY FORTEVIOT

\$1.25

It is a deep golden yellow changing to deep apricot and having a very pleasing fragrance. A vigorous, bushy grower with glossy, bronzy green foliage and a continuous bloomer. Excellent in nearly all sections, but particularly recommended for coastal climate.

LADY TRENT

\$1.50

We are well pleased with this rose after growing it for several years. The bud is of average size, high pointed center, opening to a full double flower of coppery orange. Fragrant. The plant is a medium grower with very heavy, dark green glossy foliage, exceptionally free of disease. This rose should be excellent in coastal regions as well as in the warmer sections.

LOWELL THOMAS

\$1.50

 This yellow rose is one of the best of the newer roses. The nicely formed buds of chrome yellow open to large flowers of rich yellow with a moderate fragrance. The plant is a strong grower with large, dark green foliage that has been free of disease.

PLANT PAT. 595

LUCIA ZULOAGA

\$1.25

Lucia Zuloaga offers a color different from any other rose. It is a deep brownish scarlet with a golden undertone. While it has but from fifteen to twenty petals, it is very attractive both in the bud and open flower; very prolific in its bloom. The plant is a vigorous spreading grower (2 ft.) with perfect glossy green foliage that has been free of disease. An excellent coastal rose.

LULU

\$1.25

We feel this old rose is worth growing. No other has such long slender perfectly formed buds as Lulu. Buds are a rich salmon rose. Plant is a medium grower, with clean foliage. A prolific blooming rose, though semi-single; excellent for cutting.

MAJOR SHELLEY (Howard & Smith)

\$1.25

Especially adapted to coastal regions. The large, long pointed bud is produced on long stems. Its rich crimson scarlet bloom has fine form and is most attractive. The bush is of upright habit, moderately vigorous, with fine array of leathery foliage. A good rose.

PLANT PAT. 447

MARK SULLIVAN

\$1.50

For a display of dazzling color, Mark Sullivan is the rose to produce it. A strong growing plant with dark green foliage, it produces an abundance of flowers throughout the season. The ovoid buds are golden yellow heavily veined with rose pink and cerise; a brilliant display of color in the open flower. This rose is at its best in warm climates.

PLANT PAT. 599

McGREDY'S SUNSET

\$1.50

This rose is very appropriately named! It is a high centered, double rose having a combination of light yellow, deep chrome yellow and scarlet. The plant is a vigorous grower with bronzy green foliage. A prolific bloomer and fragrant. It grows to perfection in a cool climate.

PLANT PAT. 317

McGREDY'S YELLOW

\$1.25

A really fine rose and a very prolific grower and bloomer. Flowers are large and of a bright buttercup yellow of good form. Foliage is glossy, dark green with deep reddish green stems. This is truly one of our finest yellows.

MISSION BELLS

(Germain's Seed Co.)

\$2.50

An early blooming deep salmon pink rose. The long pointed buds, usually borne singly on a stem, open to full centered flowers of average fragrance. The plant is exceptionally vigorous in growth and rangy in habit and seemingly quite resistant to disease. An excellent rose.

PLANT PAT. PENDING

MME. COCHET-COCHET

\$1.50

One of the best coppery pinks. The long pointed buds of coppery pink, flushed orange at the base, open to large beautifully formed flowers with gold at the base. As the open flower ages it changes to a soft, satiny pink disclosing a mass of golden stamens, and gives off a sweet, honey like fragrance. These unusually free flowering plants grow tall with fine foliage. An exceptional rose for Southern U.S. A winner of the Bagatelle Gold Medal.

PLANT PAT. 129

MME. HENRI GUILLOT

\$1.50

This rose is proclaimed throughout the country as one of the best in cultivation today. The buds are long and pointed and of a clear orange, coral and red with gold at the base of the petals. The opening buds are urn shaped and the open flower camellia shaped. The petals have an exceptionally heavy velvety texture. The plant is one of the best found in roses with heavy dark green leathery foliage from the ground to the neck of the bloom. Very floriferous.

PLANT PAT. 337

MRS. E. P. THOM

\$1.00

A good, outstanding old yellow rose. The medium sized, well formed buds of clear canary yellow are borne in great quantities on a strong well balanced, glossy foliaged plant. The double clear yellow open flowers are moderately fragrant. A good dependable rose.

MRS. EDWARD LAXTON

\$1.25

A satisfactory rose of the lesser known varieties. The large ovoid buds open to full, very double flowers of luminous old rose with flamingo orange undertones. An excellent cut flower with fine strong stems and fragrance which come from a very vigorous, upright growing plant with heavy, dark green, disease-resistant foliage. An excellent rose.

Bush Roses

MRS. H. M. EDDIE

\$1.50

One of the better creamy whites. A full heavy bud opening to a large, very double rose, whose high center is creamy white, passing to pure white on edges. The foliage is large, dark and leathery, with a consistant gloss. The plant is a medium grower, but well shaped. An interesting rose.

PLANT PAT. 753

MRS. PIERRE S. DU PONT

\$1.00

For color and form, this rose is among the best. The bud is of medium size, pointed, and of a beautiful reddish gold opening to a semi-double, very fragrant flower of deep golden yellow. A strong growing plant with an abundance of disease-resistant foliage. The most prolific bloomer of all the yellow roses. Especially good in Southeastern U. S.

MRS. SAM McGREDY

\$1.25

This rose is probably the best of the roses that this famous hybridizer has produced. It has a wonderful combination of colors, scarlet, orange heavily flushed with Lincoln red on outside of petals. Buds are large and long pointed, flowers double, fragrant and very lasting. The bush is a medium grower with abundant glossy foliage; young foliage a dark reddish green. A prolific bloomer.

NEIGE PARFUM

\$1.50

One of the most fragrant roses. The long, well formed bud is creamy white, but with faint shadings of lemon at the base, and opens to peony shaped flower of pure white. These flowers are produced on long stems from a medium full plant, clothed in dark, heavy foliage.

NEW YORKER (Jackson & Perkins)

\$2.00

A very double red rose, which is attractive through all stages of development. The multi-petaled full bud opens to showy scarlet rose with a rose red undertone overlaid with a rich velvety sheen. The blooms, of raspberry fragrance, are long lasting and do not blue under normal conditions. A vigorous, somewhat upright grower of about 3 ft., well clothed with attractive foliage.

PLANT PAT. 823

NIGHT

\$1.25

This blackish crimson rose, shaded maroon, is one of the darkest reds. The long, well shaped buds are borne on a medium growing plant, and open into quite a double, high centered flower, which has a spicy clove and cinnamon fragrance.

NOCTURNE (Swim)

\$1.50

One of the newer red roses. The buds which are long and streamlined, are very dark red with blackish sheen. Plant is a strong bushy grower with dark green foliage. Moderately fragrant. Will mildew in cooler climates. Best in very warm, dry climate.

PLANT PAT. 713

NUMA FAY

\$1.25

A fine full rose of unusual coloring. The large, long buds of coral pink with salmon orange at the base of the petals, open into very large, wholesome and fragrant blooms with satiny reflection. These splendid blooms are borne on long, stiff stems, which radiate from a vigorous, well clothed plant. This consistent bloomer produces large numbers of showy blooms excellent for cutting throughout the blooming season.

PEACE

\$2.00

We still think Peace is one of the finest roses yet introduced. We have found that often the first bloom to come out in the spring is pale but from then on the color deepens.

The range of colors through which Peace passes is almost unbelievable. Here in our climate the opening color varies from primrose yellow to lemon yellow with edges tinged cerise. As the large 50-petal rose ages, the yellow becomes lighter while the pink to watermelon shades intensify. With the new and older bloom on the plant at the same time, one can picture the unusual and beautiful show of color, which is displayed throughout the season. The rose has fragrance, too, and it is an excellent cut flower, with superb substance.

Another crowning feature of Peace is that the plant is just as wonderful as the bloom. It is a very strong grower, four feet or more, with long, strong stems and excellent large, dark green, leathery, disease-resistant foliage.

PLANT PAT. 591

PEACH BLOW

\$1.25

A beautifully formed fragrant double rose of peach pink, flushed and veined rose pink, with a golden base, produced on strong stems. Excellent for cutting. Plant is a very vigorous grower with dark green, leathery, disease-resistant foliage. Excellent in coastal areas.

PICTURE

\$1.25

What a picture it is! Every rose seems to be perfectly formed. It is a medium size double flower with a perfectly formed high pointed center, with outer petals reflexed and unusually lasting. The color is a warm, cheerful lasting, velvety rose pink, with an undertone of salmon. Tea fragrance. The plant is a medium grower with a fine thick dark green, fairly resistant foliage. An abundant bloomer.

PILARIN VILELLA

\$1.25

A very vivid colored rose blending from orange to lacquer red, with dark red, glossy, disease-resistant foliage. It is best adapted to coastal regions. Fragrant.

PINK GROOTENDORST

\$1.25

This carnation rose, although a distinct novelty, is most colorful. The very strong upright plants, covered with healthy, disease-resistant foliage, produce quantities of soft pink clusters. The petals and flower structure truly resemble that of a carnation. A unique rose.

PINK MOSS

\$1.25

This original moss rose of the 16th century is probably the most satisfactory and attractive of the moss group. A vigorous, highly productive pink, which seems to be at home in partial shade as well as full sun.

PRESIDENT HERBERT HOOVER

\$1.25

It has a long pointed bud of orange scarlet opening to a large flower of orange and pink. As the flower ages the bright colors pass to a creamy pink. The petals of this rose have such a wonderful substance that it is an unusually fine cut flower. A very strong upright grower. Mildews slightly.

PRESIDENT MACIA

\$1.25

A lovely large double two toned pink rose. The inside of the petals is a flesh white, while the outside is veined and suffused with a rich mauve rose. Plant is a very strong grower and a profuse bloomer. Prefers warm weather. Recommended for Southern States.

Bush Roses

RAMON BACH

A soft, pastel colored rose of great floriferousness. The large opening buds are a dark apricot buff on the outside of the petals with a touch of salmon pink to orange on the inside. These buds open to large, very double spiral centered blooms of apricot buff to orange, oozing with a fruit like fragrance. The upright plants are covered with clean foliage and produce strong, long erect stems of majestic appearance. A good rose in most climates, especially fine in cooler weather.

PLANT PAT. 366

\$1.50

RAPTURE

The best of the Ophelia family. The strong well branched plants produce long pointed buds of pink with shades of apricot. These opening blooms possess good fragrance and all the charm and beauty of the Ophelia group.

\$1.25

RED TALISMAN

A Talisman sport originating in our fields. The long pointed bud is a deep maroon red passing to a lighter shade in the sun. The many long stems are borne on erect growing plants of vigorous nature making an excellent cut flower especially in early spring. The medium sized double flowers are quite fragrant.

\$1.25

ROCHEFORT

\$1.25

This tall upright growing plant with fine, clean glossy dark green foliage produces very fragrant blooms. These very double flowers of orange and old rose blended into a clear color with no shadings are very striking. A very satisfactory rose in the orange colored group.

PLANT PAT. 191

RUBAIYAT

\$1.50

 The following is the introducer's description: Rubaiyat is a brilliant red rose with a most graceful, long shapely bud, a promise of untold pleasures and a satisfying wealth of old rose fragrance. The brilliant red to crimson color in the half open flower is accentuated by the reverse which is several shades lighter. The extra large flowers are borne on long, strong stems in great profusion. The plant is a tall, very vigorous grower with luxuriant, dark green foliage. We believe this plant is best adapted to the warmer areas.

PLANT PAT. 758

SAN FERNANDO (Morris)

\$2.00

This is a satisfactory new red rose for warmer climates. Buds are long, pointed, and open to double non-fading flowers of glowing scarlet with exceptionally strong fragrance. Plant is a strong upright grower with heavy, semi-glossy foliage.

PLANT PAT. 785

SAN LUIS REY

\$2.00

A most brilliant yellow rose which is very attractive in color and fragrance. The deep saffron yellow buds are medium sized and globular in shape and usually borne singly on strong stems. The multi-branched, strong plants are supported by rich, dark, glossy green, disease-resistant foliage, making it most desirable. A bright yellow which is a "standout" amongst other yellows.

PLANT PAT. 860

\$1.50

SANTA ANITA

\$1.25

A good, substantial pink rose of excellent form and color. The strong pink buds of excellent form open to double, high centered blooms, which attain a height of exquisiteness as they pass to a silvery pink. The good, sturdy stems are produced on vigorous bushy plants with large light green foliage. This profuse bloomer of good fragrance is an excellent addition to the garden.

PLANT PAT. 539

SATURNIA

\$1.50

For brilliance of color and beauty of form, this rose is unsurpassed. The perfectly formed long pointed buds of cardinal red open to semi-double flowers of brilliant scarlet to cardinal red with a reverse of salmon yellow and copper. This is truly a most striking combination, with a strong fruity fragrance. Its vigorous growing plants are pleasing in themselves, with their dark green leathery foliage. Especially adapted to the coastal climates.

PLANT PAT. 349

SHOT SILK

\$1.25

A beautiful combination of orange rose overlaid with yellow and suffused with pink. Bush is a good grower with an abundance of glossy, dark green foliage. Will thrive in shade. A continuous bloomer with cup shaped, fragrant flowers.

SHOW GIRL (Dr. Lammerts)

\$1.50

This is what the introducer says about it: Amazingly long, lovely buds, perfect for cutting, borne on long stems. The color is a rich phlox pink, deeper in the spring, lightening as the flower opens to a softer tone but always deep pink. The plant is a very strong grower with fine, large foliage—a very prolific bloomer. This description applies to Midwest, East and South.

PLANT PAT. 646

SIERRA GLOW

\$1.50

This is a lovely rose when properly grown. The long pointed salmon pink buds open to double flowers of light pink with a reverse of orange salmon. The low growing multi-branched plants should be pruned very lightly on the top, but the spreading growth should be cut away to force the growth upward. When this is done, it is a very satisfactory rose.

PLANT PAT. 521

SIGNORA

\$1.50

This rose from Italy is a real masterpiece, in both plant and bloom. Long bud of a warm burnt sienna opening to a lighter hue toward mandarin. The plant is a tall grower (4 ft.) with every bloom on a long, strong stem. The foliage is handsome. (Colle Oppio Gold Medal 1935.)

PLANT PAT. 201

SISTER THERESE

\$1.25

It has a long pointed bud of golden yellow often streaked with carmine, opening to a large semi-double flower. Foliage is medium size and leathery. A vigorous growing plant and free blooming. Fine.

Bush Roses

SONATA

We are very enthusiastic over this rose as it is one of our best cutting, exhibition roses. Its long pointed buds of cochineal red open to full double roses of lively deep pink with the reverse of the petals being slightly darker. This harmonious contrast with its mild aroma make it most desirable. The blooms are borne on strong stems on vigorous growing plants with a good leathery foliage. An excellent rose, although at times it fades.

PLANT PAT. 732

\$1.50

SNOWBIRD

This is truly a snow-white rose of good fragrance. The medium sized, long flaring buds open into snowy white, very double, high centered blooms, which remain very attractive throughout. The very vigorous, free branching plants, covered with a disease-resistant leathery foliage, are extremely free blooming. An excellent white rose under most conditions.

SUSAN LOUISE

This lovely rose has proven satisfactory wherever grown. A seedling of the Belle of Portugal, but a bush rose and a continuous prolific bloomer. Bud is long and slender and of a deeper shade of pink than its parent; stems are long and firm. Growth is extremely vigorous and practically thornless. No garden is complete without Susan Louise.

SUTTER'S GOLD

(H. Swim)

\$1.25

An excellent rose featuring exquisite, long pointed, bright yellow buds, richly shaded orange and red. The opening flower is a lovely high centered arrangement of about 30 crisp, heavy textured petals, and it possesses a superior fragrance unusual to yellow roses. The very vigorous well balanced plant has been very resistant to the common rose diseases. A fine rose! Winner of Foreign Gold Medal of the famous Bagatelle Rose Trials in Paris.

PLANT PAT. PENDING

SWEET SIXTEEN (W. E. Lammerts)

\$1.50

Here is a superb rose, particularly adapted to coastal areas. The long slender buds open to beautifully formed flowers of light pink with shades of rose and gold. These sweetly scented blooms are borne on strong stems and are excellent cut flowers.

PLANT PAT. 631

TAFFETA

(Dr. Lammerts)

\$1.50

Resembling the old favorite, Mrs. Sam McGredy, Taffeta is outstanding in its ability to produce long stemmed, perfectly formed, fragrant buds of pink to salmon, with varying color combinations. Plant is a strong, upright grower with reddish green foliage. Best in warm climates.

PLANT PAT. 716

TALISMAN

\$1.00

The color is a mixture of red, yellow and copper in varying proportions. The bud is long pointed and opens to a medium size flower of the same colors. Extremely fragrant. An excellent cut flower. Growth is vigorous and upright. Mildews slightly.

TALLY HO

(H. C. Swim)

\$2.00

This bi-colored rose is an attractive new dark pink rose with a spicy fragrance. The large ovoid buds of Chinese red pale to Chinese rose as the bloom opens. In the open flower, the mild contrast of the inside color of Chinese rose to the outside of the Chinese red is most pleasing. The depth and tone vary with the season and locality. The strong growing plant branches well, producing many flowers on long stems which seem especially adapted to the warmer regions.

PLANT PAT. APPLIED FOR

TEXAS CENTENNIAL

\$1.25

Texas Centennial is a sport of the popular rose President Hoover. Type of growth is the same although it appears to have more and better foliage. Quite prolific in bloom. Flowers are brick red, having a faint tinge of gold, with a lighter center. This rose has shown up very well. A splendid exhibition rose.

PLANT PAT. 162

THE CHIEF (W. E. Lammerts)

\$1.50

We like this rose for its profuse blooming qualities and the excellent plant. The long buds of deep rose flame open to large fragrant flowers of flame, coral and copper. The plant is a very strong, upright, spreading grower with large dark green leathery foliage.

PLANT PAT. 456

THE DOCTOR

\$1.25

The Doctor is a fine addition to our small group of fine true pink roses. The buds are very long and pointed and open to very large double flowers of light pink. The plant is a medium grower, intensely fragrant.

POLYANTHA and FLORIBUNDA ROSES

Polyantha are the small roses usually produced in clusters and commonly called "Baby Roses". Floribunda is a new classification of the larger flowering varieties of the polyanthas which are becoming more popular. They are most effectively used in mass plantings along driveways, walls or for border planting, etc. Floribundas come in a wide range of colors and produce a mass of color over a long period of time. All of those listed below are quite free of disease.

BETTY PRIOR

\$1.25

For a mass of color and continuous bloom Betty Prior is one of the best. The single blooms, produced in large clusters, are shrimp pink on the inside of the petal and carmine pink on the outside. The plant is a very strong grower (4 to 5 ft.) with healthy, leathery foliage.

PLANT PAT. 340

CALIFORNIA GOLD

\$1.25

This polyantha is most striking in color and does not fade too readily. The large clusters of globular bright orange yellow flowers are borne on strong shoots, which keep coming throughout the blooming season. A rose especially adapted to border plantings and color accents amongst foundation plants. A very vigorous bushy grower.

CECILE BRUNNER

\$1.25

The sweetheart rose. Buds small, beautifully formed. Flowers light pink with yellow at the base of the petals. A continuous bloomer and fragrant.

CINNABAR

\$1.50

A medium sized semi-double bloom of brilliant cinnabar or vermillion to scarlet red. As the flower ages, the petals take on dark shadings. The plant is an excellent grower with large, glossy, dark green foliage. Disease-resistant. Growth about 3 feet.

FASHION  (**Jackson & Perkins**) \$2.00

An exquisite new floribunda in a color new to the rose world. The clusters of oriental red buds open into luminous coral pink flowers overlaid with gold, which soften to clear coral. As the slow opening bud unfurls, it provides a show of ruffled petals encircling a rich display of golden yellow stamens.

This vigorous, bushy floribunda grows to a height and diameter of 2½ to 3 ft. being fully clothed with rich bronzy green foliage. Received Gold Medal at London Flower Show and Bagatelle Trials, Paris, France.

PLANT PAT. 789

PINKIE  (**Dr. Lammerts**) \$1.50

Here is a perfectly formed polyantha rose (baby) with long, slender buds. The open flower is about two inches across. Pinkie is very floriferous, the blooms being produced in large clusters. It produces a very compact plant of about 18 inches with small, very disease-resistant foliage.

PLANT PAT. 712

PINOCCHIO \$1.25

One of the best of the floribunda roses. The blooms come in fairly large clusters. The small pointed buds are salmon and gold changing to a soft clear pink. The plant is a bushy upright grower with an abundance of disease-resistant foliage. A continuous bloomer. Growth about 3 feet.

PLANT PAT. 484

RED PINOCCHIO (**Jackson & Perkins**) \$1.50

A popular addition to the Pinocchio group. The deep satiny carmine buds open to long lasting rich carmine flowers, which deepen in color and acquire a velvety cast as they open fully. The large clusters, interspersed with single blooms, have a delightful wild rose fragrance. The plants are bushy and rather upright producing quantities of flowers on long heavy shoots.

PLANT PAT. 812

RED RIPPLES \$1.25

If you are looking for a small pointed dark red bud suitable for boutonnieres, Red Ripples is perfection. Produced in large clusters, each bud is a perfect little buttonhole rose. Plant is a tall upright grower, a steady bloomer and with clean foliage.

ROSENELFE \$1.00

This is one of the best of the floribundas for cut flowers. A vigorous, upright growing plant with large leathery foliage. Buds are long pointed, double La France pink. Blooms are usually produced in small clusters.

SNOWBIRD \$1.25

This is one of the most satisfactory white roses. The medium sized, long flaring buds which open into snowy white, very double, high centered blooms, which remain attractive throughout. The vigorous, free branching plants, covered with a disease-resistant leathery foliage, are extremely free flowering and fragrant. An excellent white rose, but a moderate grower.

THE FAIRY \$1.25

The Fairy is a new polyantha and one of the loveliest little roses you can imagine. The small coral pink buds open to very double flowers about an inch in diameter. They are borne in large clusters and are profuse bloomers all season. The plant is a vigorous spreading grower about 1½ to 2 ft. high and 4 to 5 ft. across. Foliage is small, dark, glossy green and very free of disease.

CLIMBING ROSES

BLAZE \$1.50

This is one of the more spectacular climbers. The cup-shaped, blazing scarlet blooms are borne in clusters which cascade downward completely covering the plant. The recurrent bloom is slightly fragrant and contrasts well with the large, dark leathery foliage. A plant that requires a minimum of care, being vigorous in growth. A good rose for brilliance of color, similar to Paul's Scarlet, but a more consistent bloomer.

PLANT PAT. 10

FLORADORA \$1.50

 Here is one of the new floribundas which is different from any other rose of its type. It is a brilliant cinnabar with shades of scarlet geranium red. The 25-petaled rosette flowers are borne in small clusters and in our coastal climate blooms about eight months of the year. The plant is a tall grower, 4 feet, with excellent bronzy green foliage.

GERANIUM RED (**Jackson & Perkins**) \$1.50

A new floribunda rose of exceptional appeal. The blackish red buds open slowly into a vivid scarlet rose of geranium fragrance. The single and clusters of bloom have an interesting tumbled pattern of inner petals which resemble that of the old fashioned red geranium. The compact, medium sized bush is vigorous and hardy and seemingly not susceptible to the common rose diseases. One of the better new floribundas.

PLANT PAT. 811

GOLDILOCKS (**Boener**) \$1.50

Here is the best yellow floribunda we have seen so far. The buds are of medium size and open to very double, fragrant blooms which are produced in clusters. The plant is a vigorous, bushy grower, well covered with leathery, glossy, disease-resistant foliage.

PLANT PAT. 672

MARGO KOSTER \$1.25

A low, compact growing polyantha (18 inches) with an abundance of medium sized, disease-resistant foliage. The blooms, which are ovoid in form, are orange red in color and are produced in clusters throughout the season.

ORANGE TRIUMPH \$1.00

This rose produces a spectacular mass of color. The small, cup shaped semi-double roses are borne in large clusters throughout the season. Each plant produces hundreds of bright orange red blooms which form a magnificent color mass in contrast to the heavy green foliage. Especially adapted for mass planting, hedges, etc. The name is deceiving as Red Triumph would better describe the rose.

PERLE d'OR \$1.25

An attractive polyantha. The pointed buds of salmon orange open to very double fragrant flowers of salmon pink to yellow. The flowers are often borne in clusters amid an abundance of soft green foliage.

PINK BOUNTIFUL \$1.50

These semi-double roses, with perfectly formed buds, are two-toned pink. Blooms are produced in clusters throughout the season. An excellent cut flower. Plant is a strong, bushy grower.

PLANT PAT. 601

CLG. CECILE BRUNNER	\$1.25	CLG. LADY FORTEVIOT	\$1.25
A strong growing climber which produces quantities of small, beautifully formed buds. The flowers are a light pink with yellow at the base of the petals. The small, soft green foliage is quite compact, forming an interesting background for the masses of pink buds and flowers.		An excellent climber for the cooler coastal areas. A very vigorous climber with glossy, bronze green foliage that produces a continuous show of blooms. Its very deep golden yellow to orange yellow buds open to deep apricot blooms of exceedingly fine fragrance.	
CITY OF YORK	\$1.50	MERMAID	\$1.50
The short ivory white buds open to semi-double white flowers of about two inches in diameter with showy yellow stamens. The flowers are borne in small clusters throughout the season on strong growing plants. The fine medium sized dark, glossy foliage is a show in itself.		Immense single flowers of sulphur yellow with amber stamens. Buds come in large clusters and bloom over a long period of time. Plant is a very vigorous grower with glossy, disease-resistant foliage.	
CLG. CRIMSON GLORY	\$2.00	CLG. MME. BUTTERFLY	\$1.25
This is a good red climber for warmer areas. The typical Crimson Glory blooms, large, high centered crimson blooms, are produced on strong stems over a long period on a compact, well clothed plant. The combination of excellent form, fascinating fragrance and profusion of blooms stamp it as a good red climber.		One of the best pale pink climbers; a member of the Ophelia family. This very vigorous rose produces quantities of long, pointed buds on strong stems. The high centered, double blooms of salmon flesh with light yellow at the base of the petals are moderately fragrant. The heavy green foliage is excellent.	
PLANT PAT. 736		CLG. MME. HENRI GUILLOT	\$1.50
DR. JOHN GALLWEY	\$1.50	An excellent appearing plant with heavy, dark green, leathery foliage. The buds are long and pointed and of a clear orange coral and red with gold at the base of the petals. The opening buds are urn shaped and the open flower camellia shaped. It is very floriferous in the spring slowing down considerably during the summer and fall.	
This rose will appeal to those liking a snow white single rose produced in great trusses. The plant is an exceptionally strong grower with glossy dark green disease-resistant foliage. Especially recommended for coastal regions.		PLANT PAT. 788	
CLG. DUCHESS OF PENARANDA	\$1.25	CLG. MRS. SAM McGREDY	\$1.50
A strong grower of appealing color. The buds are brilliant orange, opening to coppery apricot. However, this color does change at different times of the year as the flowers age. Each new tone of color is always a pleasant surprise. This climber has plenty of light green foliage with an abundance of fragrant blooms. One of the best in its color range.		We unhesitatingly recommend this climber as one of the finest in commerce. Its striking coppery pink to salmon pink blooms are produced incessantly throughout the blooming season. This wonderful combination of scarlet, orange and salmon pink heavily flushed with Lincoln red on the outside of the petals gives a dazzling display of color. The buds are large and long, opening to very full, double flowers of good fragrance. The very vigorous plants are covered with an abundance of glossy green foliage which is a spectacular reddish green when young. A fine climber anywhere.	
CLG. E. G. HILL	\$1.25	PLANT PAT. 394	
A good red climber producing very large blooms of dazzling scarlet shading to deeper red. This very double rose is exceedingly fragrant and seems to cut well. This good growing plant has healthy clean foliage and is a free bloomer. One of the better red climbers in the large bloom group.		CLG. MRS. HERBERT STEVENS	\$1.25
CLG. ETOILE DE HOLLAND	\$1.25	This climber has a most perfectly formed white bud with pleasant fragrance, but being a tea rose, its stems have a tendency to be weak. It is a strong grower with good foliage, but must be planted in full sun to secure best results. Except for its weak stems, it is a good rose.	
A climbing sport of one of our best red roses. This beautiful dark, velvety maroon red seldom blues. Its great abundance of fragrant blooms are excellent for cutting. Often the growth is slow the first year, after that it is a very vigorous grower, with plenty of heavy disease-resistant foliage. The best red climber.		PAUL'S SCARLET	\$1.25
HIGH NOON  (H. Swim)	\$2.00	A most spectacular rose in the spring. Entire bush is a mass of medium size, intense, vivid scarlet blooms, often producing a scattering of summer blooms.	
A pillar type yellow climber of spectacular color. The medium sized buds are a bright golden yellow, usually borne singly, which lighten when open, giving forth a mild fragrance. The rich green foliage appears to be resistant to the usual rose diseases. The continuous blooming habits, even through the summer, make it a most satisfactory accent plant.		CLG. PEACE	\$2.00
PLANT PAT. 704		A remarkable sport of the bush Peace. The buds are golden yellow enlivened by a flush of vivid pink at the petal edges. These buds open slowly, giving long lasting blooms that show delicate tints of yellow, pale gold, cream and ivory, blended on each petal to a lightly ruffled edge of pink. The plants are as remarkable as the blooms, with strong stems, shining dark green foliage and tremendous vigor. An excellent climber. Limited quantity available, mostly 1 year old.	
CLG. HINRICH GAEDE	\$1.50	PLANT PAT. PENDING	
A medium growing climber for a limited space, producing a continuous array of brilliant flowers. The bud is a clear nasturtium red, opening to a large, very double flower of orange red. The attractive bronze green foliage is quite resistant to disease. A good brilliant colored climber.		CLG. PICTURE	\$1.50
PLANT PAT. 244		One of our best pink climbers. A strong grower, more satisfactory in the climber than in the bush, but with the same high centered specimen type bloom.	
		PLANT PAT. 524	

CLG. RED TALISMAN

\$1.25

A fine red for early spring color. The large quantities of deep maroon red buds are borne on long, strong stems suitable for cutting. In hot weather the buds pass to pink tones. The foliage is the typical Talisman light green.

CLG. ROSE MARIE

\$1.25

A climbing sport of that old favorite bush rose, Rose Marie. Buds are large globular, moderately fragrant and a clear rose pink. Fine stems and foliage.

CLG. SHOT SILK

\$1.25

Another fine climber. A sport of the well known bush variety that is satisfactory in all localities. Flower slightly larger than the bush type and of the same orange rose color suffused with pink. Glossy foliage.

SUNGOLD (Geo. C. Thomas, Jr.)

\$1.50

This is one of the finest yellow climbers we have seen in many a day. The buds are long, pointed and a clear golden

yellow. As a rule, the buds come singly on long strong stems and are freely produced throughout the season. The plant is a strong climber with clean glossy foliage. In the years we have grown it, it has been absolutely free of disease.

CLG. TALISMAN

\$1.25

A fine climber of a mixture of red, yellow and copper. The bud is long pointed, and opens to a medium sized flower. A very fragrant flower, suitable for cutting.

CLG. TEXAS CENTENNIAL

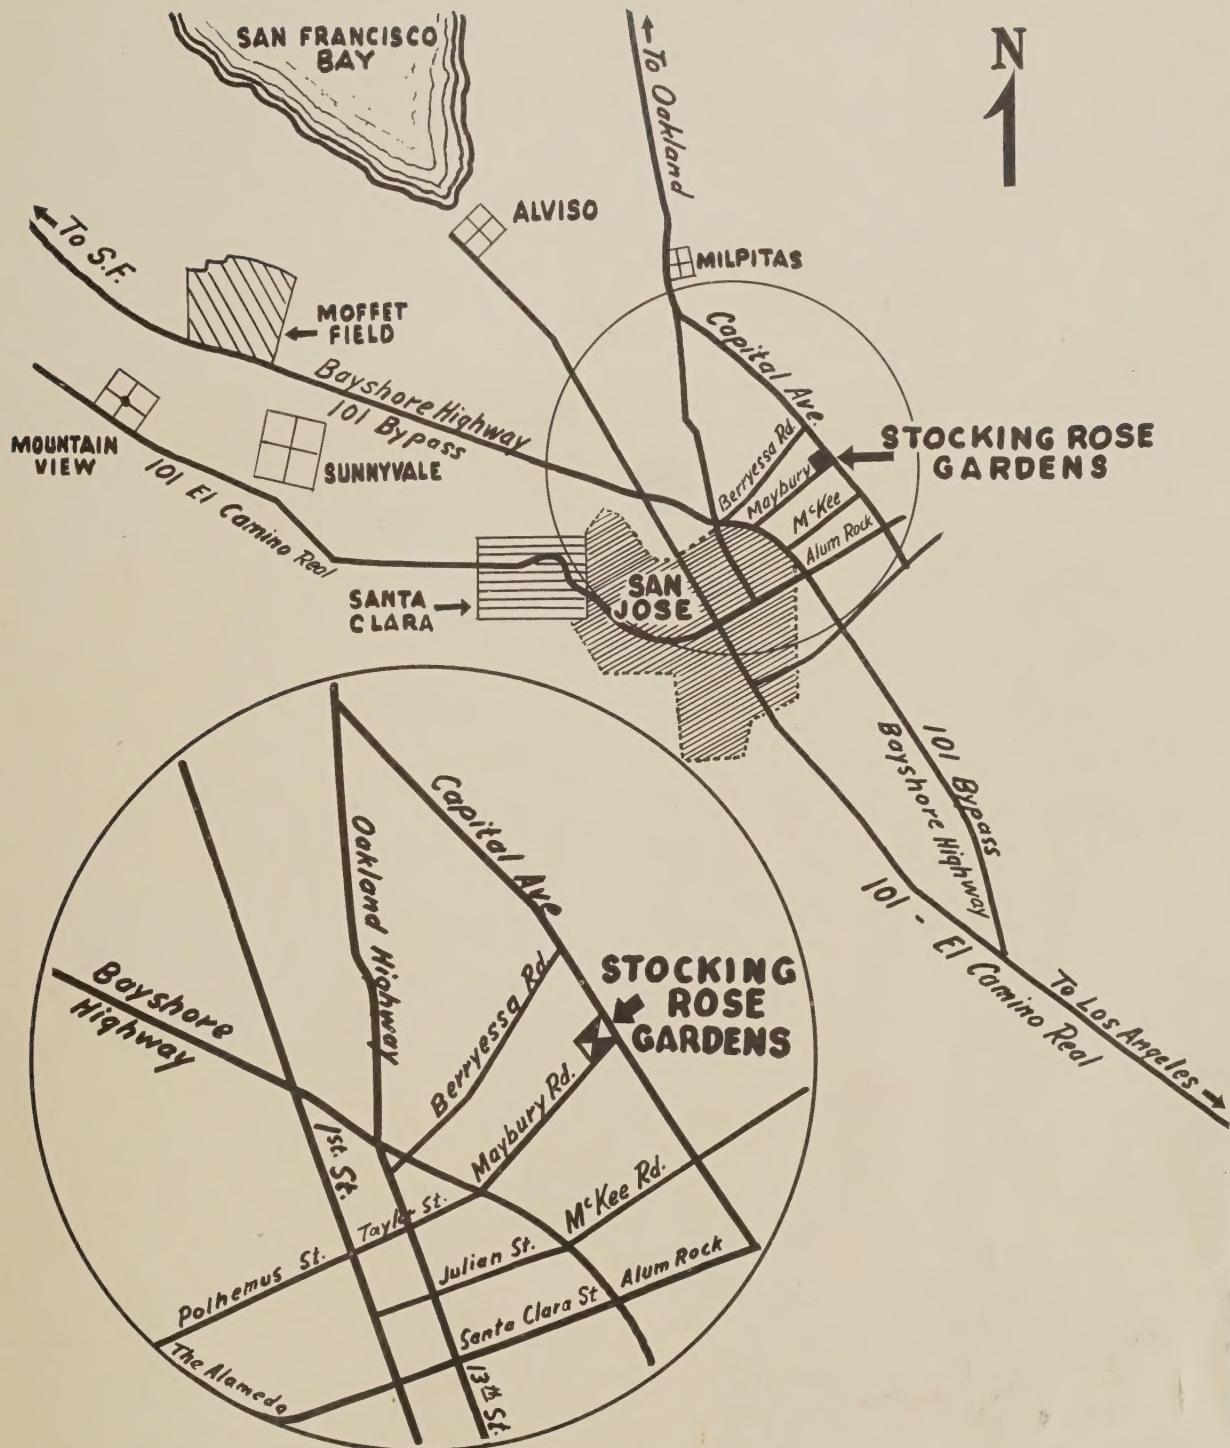

\$1.50

An extremely strong growing climber which produces an abundance of long stemmed blooms suitable for cutting. The long, erect stems produce large brick red to carmine red buds of excellent form, which open into huge rosy red full blooms. This is one of the better strong growing climbers, with spicy fragrance.

PLANT PAT. 565
